1. Claims 12-19 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Election was made without traverse in Paper No. 10.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

3. (e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIA (pre-AIA 35 U.S.C. 102(e)).

4. Claims 1-11, 20 and 21 are rejected under 35 U.S.C. 102(e) as being fully anticipated by any one of Lavoie et al '159, Griffin et al or DeWeerd et al.

Each of the above references uses flash memory to store consumption information, programming information and calibration information. See marked portions of columns 9-14 of Lavoie et al '159. See the marked portion of column 8 of Griffin et al. See the marked portions of columns 7, 10, 11, 14 and 16 of Deweerd et al.
